DETAILED ACTION

The applicant has cancelled claims 1-5 and added new claims 6 and 7 in the amendment dated 2/26/07.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 6 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 5,261,647 to Venegas, Jr. et al.

Regarding claim 6, Venegas discloses a barrier covered by polymeric sheathing (column 2, lines 57-58; fig. 5: 54 & 30) having a pair of spaced vertical supports (22) with a lower end coupled to the ground, a horizontal bar (fig. 1: 14) having two ends which extend beyond the two vertical support tubes, the ends of the horizontal bar are coupled to respective vertical tubes (fig. 1), wherein the horizontal crossbar includes two lower holes (fig. 2: where 44 points) which receive the upper ends (27) of the vertical supports, each vertical support includes a threaded fastener (fig. 5: 39) to receive a threaded member (38) inside (through) each end of the horizontal member, the threaded member (38) projecting in an outward manner (fig. 5: see threaded member pointing outward of the horizontal member) to prevent lift off of the horizontal member.

Regarding claim 7, Venegas discloses end caps (58) on the horizontal member.

Response to Arguments

Applicant's arguments filed 2/26/07 have been fully considered but are moot under new grounds of rejections.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
